Within normal range

No episodic events exceeded the defined monitoring thresholds during this period. Vital signs remained within expected ranges throughout.

Red bars indicate days with detected episodic events.

### Vital Sign Distribution

### Monitoring Activity

Bars indicate monitoring hours/day. Red threshold line indicates clinical monitoring baseline.

Episodic event: threshold exceeded continuously for  $\geq 1$  hour. Episodes separated by  $\leq 1$  hour of normal vitals are counted as the same event. Brief threshold crossings that do not sustain are not flagged.
