

Patient ID: GarrettPeriod: April 1 to April 18, 2026Report Date: April 19, 2026Coverage: 365/430h (85%)

Patient's monitoring period was less than 30 days; this report covers all available data. Decision-support summary derived from longitudinal vital sign trends; interpret in clinical context.

Clinical Alerting Thresholds

Very Low HR < 40 bpm
Very High HR > 110 bpm

Low HR < 45 bpm
Elevated Breathing > 24 brpm

Elevated HR > 95 bpm
High Breathing > 30 brpm

High HR > 100 bpm
Very High Breathing > 40 brpm

Last 24 Hours

Last 24 Hours: ELEVATED

30-Day Tier: RED

Vital	Avg	Min	Max
Heart Rate	61 bpm	50 bpm	72 bpm
Breathing	23 brpm	14 brpm	47 brpm

Last 24 hours: three elevated breathing episodes in the evening.

Episodic Events (last 24h)

Date	Time Span	Duration	Episodes	Condition	Avg	Min	Max	Comment
Apr 17	11 PM to 4 AM	7h	3	Elevated Breathing	25	15	47	Check SpO2 and lung sounds; assess for fluid overload or early infection

17 episodic events Detected, spanning 38h total. Conditions: Elevated Breathing, High Breathing. Priority grade: High

Episodic Events	Total Hours	Highest Burden	Episodes/day	Coverage
17	38h	Elevated Breathing	<1	85%

Major Findings: Sustained elevated breathing (avg 26, peak 57)

Date	Time Span	Duration	Episodes	Condition	Avg	Min	Max	Comment
Apr 14	11 PM to 2 AM	3h	1	High Breathing	33	23	57	Check SpO2, work of breathing, fever; consider pulmonary cause or CHF
Apr 13	6 PM to 7 PM	35h	16	Elevated Breathing	26	14	57	Check SpO2 and lung sounds; assess for fluid overload or early infection

Suggested Clinical Review Actions

- Elevated Breathing (avg 26 brpm, peak 57 brpm): Check SpO2 and lung sounds; assess for fluid overload or early infection
- High Breathing (avg 33 brpm, peak 57 brpm): Check SpO2, work of breathing, fever; consider pulmonary cause or CHF
- Overall trajectory shows 2 unstable phases with 9 bpm variability. Consider increasing monitoring frequency and lowering escalation threshold.

- Clinical Pattern Observations:
- 1. **Sustained finding:** 10h continuous Elevated Breathing beginning Apr 13.
 - 2. **Breathing variability:** RR spread 10 brpm (15 to 25).
 - 3. **Clustered pattern:** Episodic events on 5 of 18 days (27%).

Red bars indicate days with detected episodic events.

Vital Sign Distribution

Monitoring Activity

Bars indicate monitoring hours/day. Red threshold line indicates clinical monitoring baseline.

HR episode RR episode Recorded, no episode No data

Episodic event: threshold exceeded continuously for ≥ 1 hour. Episodes separated by ≤ 1 hour of normal vitals are counted as the same event. Brief threshold crossings that do not sustain are not flagged.
